

Need to dispense online? We make it easy.

Save Time

Get online in no time by letting DermTeam build, manage, and run your online store

Save Money

Getting started is free, while the ongoing revenue share means you start making money from the first sale

Improve Service

Your customers will love the service and convenience of visiting you online and shopping for your recommended products

Web Plus

Online Dispensing for Skincare Professionals

Web Plus is DermTeam's premiere service offering for skincare professionals. Web Plus allows skincare professionals to start selling their own product selection with a uniquely branded online store.

With Web Plus:

- Share in the revenue generated from online sales
- Sell from your uniquely branded website and webstore
- Have your own place online – www.yourpractice.com
- Offer the same products currently offered in the office
- Merchandise only quality and efficacious products
- Rely on DermTeam to carry and manage all inventory
- Avoid the costs and complexity of setting up an online credit card merchant account
- Use DermTeam to pick, pack, and ship products
- Receive outstanding customer service
- Use the Internet to advertise and promote your practice

Web Plus is not a packaged software solution. Web Plus is not an off-the-shelf web-hosting service. Web Plus is not a “do-it-yourself” package.

Web Plus is a totally outsourced website management and online dispensing solution that eliminates the complexity of getting online.

Web Plus

Online Dispensing for Skincare Professionals

The Web Plus service is also a business partnership between the skincare professional and DermTeam. With Web Plus, product revenues are shared between the partner and DermTeam, while the costs of running, administering, and servicing the online store are born by DermTeam.

DermTeam partners save time, since they don't need to research software packages and web-hosting options or to hire and train additional office personnel.

Skincare professionals save money, since no personnel in the practice need to spend time designing and maintaining the webstore; dealing with vendors and suppliers; stocking inventory; or picking, packing, and shipping online orders. DermTeam does it all for the partner.

Best of all, in today's competitive market, skincare professionals that partner with DermTeam get all the benefits of being online, without the costs and hassles of "do-it-yourself." Patients appreciate the service and convenience of buying their favorite products online from the comfort and privacy of their homes.

With DermTeam, the skincare professional can spend more time treating and consulting with patients, and less on the hassles of eCommerce and customer service. The result is a more satisfied patient.
